Skilled Carpenter

Job Description

Introduction:

We are looking to hire a skilled carpenter with knowledge and experience of various carpentry practices. You will participate in diverse home and cottage renovations and new build projects.

Responsibilities:

- Ability to read and interpret construction plans
- Assisting site supervisors with structural design, planning, layout and installation
- Conduct repair work and installation of framing, doors, windows, drywall, cabinets, stairs and other fixtures as needed
- Install wood, vinyl, laminate and tile flooring
- Install wall tiles and other wall cladding materials
- Ability to assess the quality and knowledge of woodwork and materials
- Ability to operate tools, machines and other equipment
- Compliance with local building codes, health and safety regulations
- Provide excellent client service
- Ability to stand for prolonged periods, climb, pull and lift heavy objects

Requirements:

- Certification and/or experience in construction or related field
- Work well with other team members
- Knowledge of mathematics
- Excellent communication skills and ability to accommodate clients' preferences
- Able to communicate and provide project details to supervisors and project managers
- Reliable vehicle
- Has own hand tools

This position requires physical momentum and good hand-eye coordination. You are also required to be punctual, reliable, efficient, flexible and approachable to both coworkers and clients. You must be eager to learn and work with persistence and determination.
